

# OXFORD DRUG DISCOVERY INSTITUTE (ODDI)

ALZHEIMER'S  
RESEARCH UK FOR A CURE

DRUG DISCOVERY INSTITUTE

## WHO WE ARE

- We are part of the **University of Oxford** and funded by **Alzheimer's Research UK**
- Our team of around 30 scientists is researching potential new medicines for Alzheimer's, Parkinson's, and vascular dementia

## WHAT WE DO

- We work on the first steps of the **drug discovery process**, testing and refining potential medicines in the lab before they move to clinical trials
- Our goal is to help discover and **develop new and better ways to treat dementia**
- Our work brings biologists and chemists together to solve complex problems

## LAB TOURS

- We share expertise to make research accessible, transparent, and engaging
- We offer a look behind the scenes at how drug discovery happens in our labs
- These are **pre-arranged lab visits** for the public
- Please register your interest in a lab visit with your local dementia manager or advisor at **Dementia Oxfordshire**
